Our certification

About us.

A Journey of Innovation and Excellence.

Founded in 2013 in Roseto degli Abruzzi, Italy, LCB Srl (Laboratori Chimici Braccilli) began its journey as a specialized laboratory for the production of cosmetics and medical devices under private labels. Over the years, LCB has significantly expanded its capabilities, enriching its team with industry experts and investing heavily in research and development. This

strategic focus has enabled LCB to offer clients advanced, market-ready formulations and cutting-edge active ingredients for creating fully customized solutions.

In 2019, a pivotal milestone was achieved with the acquisition of a new facility, which facilitated the expansion of our production machinery and capabilities. This expansion was followed by the launch of a new department in 2021, dedicated to the production of dietary supplements, further diversifying our product range.

Throughout our journey, LCB has proudly collaborated with a multitude of brands, both nationally and internationally. Our commitment to innovation, quality, and customer satisfaction continues to drive us forward, as we strive to be at the forefront of the cosmetic and medical device industry.

**THE COMPLETE SOLUTION
IN THE TREATMENT OF
PSORIASIS AND KERATOSIS**

KERATOSIS TREATMENT **KERATO FORTE**

TO

TO: The image represents a condition of keratosis characterized by the presence of dry, flaky scales on the scalp.

T1

T1: The patient in question reported significant improvements in his ketatosis condition after applying **KERATO FORTE** which helped restore the balance of the skin, reducing the excessive formation of scaly crusts. After a few weeks of treatment, the patient noticed the disappearance of the skin thickening.

THERAPY : Treatment with **KERATO FORTE**
applied morning and evening for **20 days**

PSORIASIS TREATMENT **KERATO FORTE**

TO

TO: Psoriasis of the palm of the hand, with thickening of the cornified layer, and presence of scales.

T1

T1: The patient was treated with **KERATO FORTE** twice a day for 15 days, with significant improvement in the clinical picture.

THERAPY: Treatment with **KERATO FORTE**
applied morning and evening for **15 days**

Anti-Age Emollient
and Reparative

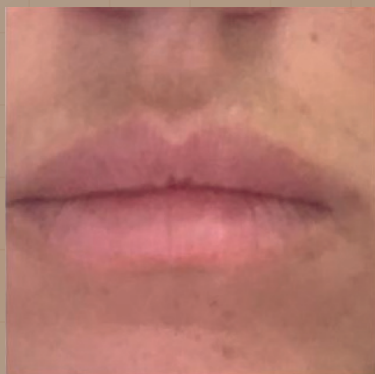

TREATMENT TRAMEXAL

TO

TRANEXAMIC ACID

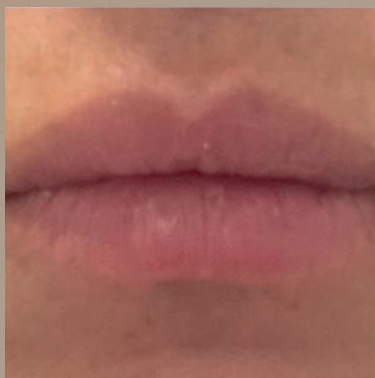

Tranexamic acid reduces inflammatory mediators and has an inhibitory effect on the tyrosinase enzyme which regulates the formation of melanin. The constant use of Tramexal reduces and prevents hyperchromia, brightens and evens out the complexion of the facial skin.

T1

FENILETIL RESORCINOL SYMWHITE:

SymWhite is an extract of natural origin with antioxidant and lightening properties, SymWhite helps to combat skin hyperpigmentation, reducing dark spots and evening out skin tone.

T2

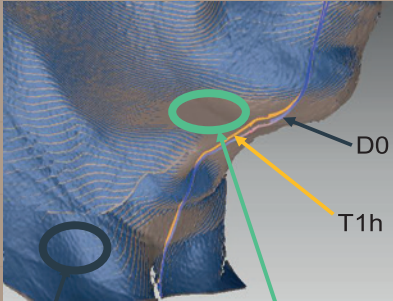

RETINOL:

Exfoliating and regenerating action, it carries out an action aimed at cellular renewal with an antioxidant effect and counteracts the action of free radicals. Thanks to its keratolytic action it allows tranexamic acid, resorcinol and kojic acid to reach the areas of the skin where there is an excess of melanin.

TREATMENT TRAMEXAL 3

28 days

TRANEXAMIC ACID

Tranexamic acid reduces inflammatory mediators and has an inhibitory effect on the tyrosinase enzyme which regulates the formation of melanin.

The constant use of Tramexal 3 reduces and prevents hyperchromia, brightens and evens out the complexion of the facial skin.

BAKUCHIOL SKINECTURA:

The use of Tramexal 3 improves the tone and elasticity of the skin of the neck, hands and décolleté.

Bakuchiol and Skinectura reduce wrinkles and hyperchromia in synergy with tranexamic acid, furthermore there is an increase in the production of collagen and elastin.
