

PRODUCT	BRADERM ADIPHASE CREMA						
CATEGORY	COSMETIC						
ACTIVE INGREDIENTS	HYALURONIC ACID 0.20% It gives hydration and turgor to the treated body skin, restoring a visibly smoother and more uniform effect. CAFFEINE 0.5% It is part of a group of substances called Methylxanthines, recognized as effective in determining the activation of adipocyte metabolism with the result of a demolition of stored fats; caffeine is therefore indicated for the treatment of localized adiposity and cellulite. GLYCOXANTINE® 1.5% Active complex consisting of different substances, whose joint action allows to fight imperfections and adiposity: Glycosaminoglycans and Xanthines, Caffeine, Theophylline and Theobromine. Xanthines are used in cosmetics for their lipolytic and thermogenic potential. For this reason, the Complex is used as an adjuvant for the treatment of fat accumulations. ADIPO-TRAP 3% ADIPO-TRAP is produced using Drosera, a carnivorous plant characterized by tentacled leaves covered with a sticky secretion that it uses as a trap to capture its prey. The particular conditions in which this plant is forced to survive are responsible for specific metabolic processes that give rise to the formation of a phytocomplex capable of modulating the metabolism of adipocytes by acting as a slimming, remodeling and anti-cellulite active ingredient. During in vitro tests on pre-adipocytes and adipocytes, ADIPO-TRAP has been shown to be able to prevent fat accumulation and reduce adipocyte size due to its lipolytic effect. In a clinical trial with an inpatient approach, ADIPO-TRAP has been shown to act effectively as a slimming and remodeling active ingredient and to be able to reduce cellulite and related pain in just 2 weeks of treatment. Riduzione della circonferenza della coscia grazie al trattamento con un gel contenente ADIPO-TRAP 3% p/p rispetto alla sola formulazione veicolo <table border="1"><thead><tr><th>Time</th><th>Thigh reduction vs. vehicle (%)</th></tr></thead><tbody><tr><td>15 days</td><td>-9.5</td></tr><tr><td>30 days</td><td>-13.5</td></tr></tbody></table> Effetto lipolitico su adipociti incubati per 7 giorni con e senza ADIPO-TRAP	Time	Thigh reduction vs. vehicle (%)	15 days	-9.5	30 days	-13.5
Time	Thigh reduction vs. vehicle (%)						
15 days	-9.5						
30 days	-13.5						

BROMELAIN 0.2 %

Enzyme with proteolytic and anti-oedema action whose function is to bring about a general improvement in the functionality of the microcirculation.

MENTHOL CAMPHOR BLEND

It is able to stimulate the skin thermoreceptors which in this case generate an initial cooling sensation followed by a subsequent heating of the treated areas. Thermoactivation is useful for increasing the active effect of the product.

VIT. E acetate 0.50%

It helps to increase the synthesis of collagen and glycoproteins, and hyaluronic acid. It has an important antioxidant action against free radicals and contributes to the maintenance of skin elasticity.

SHEA BUTTER 1%

Vegetable butter with a rich lipid composition, it has a deep emollient, re-epithelializing and moisturizing action.

INDICATIONS

Anti-cellulite slimming body cream. It improves the texture of the skin of the body affected by cellulite imperfections. Apply a small amount of product to the skin of your arms and legs and let it absorb by massaging thoroughly.
