

PRODUCT	BRADERM ADIPHASE SCRUB
CATEGORY	COSMETIC
PRINCIPLES ACTIVE	CENTELLA EXTRACT 1 % Centella is used in case of fragile capillaries and venous insufficiency, as it manages to improve vascular tone, tissue resistance and reduces capillary permeability. This is why in cosmetics it is very useful in the treatment of cellulite and in general swelling of the lower limbs. In fact, among the causes of the latter, venous insufficiency appears, responsible for water retention. VITAMIN E 0.5% Vitamin E, thanks to its antioxidant and moisturizing properties, can improve the elasticity and appearance of the skin, making it softer and more toned. By stimulating circulation and keeping the skin healthy, it helps to counteract cellulite blemishes. COCOA EXTRACT 0.3 % Flavonoid-rich cocoa extract helps protect the skin from oxidative stress, while keeping the skin more supple and hydrated. SUGAR Natural exfoliant
DIRECTIONS	This product is ideal for making the skin firm and smooth thanks to the exfoliating action of sugar which, massaged on the skin, removes dead cells and stimulates blood circulation, promoting cell renewal.
HOW TO USE	Apply the product to damp skin, in particular to areas of the body affected by blemishes, making circular movements and exerting light pressure on the skin. For a more effective and long-lasting action, apply Braderm anti-cellulite cream immediately after the scrub.
