

PRODUCT	AKARISCAB- Doccia Shampoo
CATEGORY	DERMOCOSMETIC It is a cleanser for body and hair adjuvant in the treatment of parasitic infections and scabies.
Benzyl benzoate	It has been shown to be toxic to <i>Sarcoptes scabiei</i> . Its mechanism of action is not yet clear, but given its effects on vertebrates, it is believed that it may act on the nervous system of parasites.
Neem oil 0,05%	The reason why Neem Oil is effective in fighting parasites and insects is due to the presence of a set of substances whose most important active ingredient is the limonoid Azadirachtina A. These substances act by blocking the development of insects in the juvenile stages, but it is also effective on adult insects and parasites.
Eucalyptus essential oil 0.1%	Eucalyptus essential oil has antiseptic properties. Eucalyptus oil also has a disinfectant, germicidal quality useful in treating the symptoms of scabies and has also been used to treat head lice.
Tea tree oil 0,1%	Tea Tree essential oil is known for its multipurpose anti-infective action and is also very effective as a skin and intestinal antiparasitic. Its main component, terpinen-4-ol (30-48%) has a characteristic floral and spicy odor that repels parasites.
Hydropuntil 3%	Sicilian prickly pear leaf extract rich in polysaccharides capable of carrying out an antioxidant, moisturizing and protective action on the skin as it reduces its susceptibility to redness and inflammation.
Bisabolol 0,2%	Alpha-Bisabolol has innumerable properties. Among the most relevant ones, we can say that Alpha-Bisabolol is: • Softening, soothing and calming, therefore suitable for very delicate and sensitive skin • Antibacterial and antifungal: protects the epidermis from certain fungi and bacteria • Repairer and dermoprotective on chapped skin • Soothing: calms and protects reddened skin
HOW TO USE	Take a small amount of product, create a lather with water and apply to body and hair and rinse. In case of scabies, use the cleanser before applying AKARISCAB spray lotion. SHAKE WELL BEFORE USE
