

PRODUCT	BRADERM GENTLE CLEANSER
PACKAGING	200 ml TUBE
CATEGORY	DERMOCOSMETIC
ACTIVE INGREDIENTS	CALENDULA OFFICINALIS 1% Calendula extract is an active ingredient rich in triterpenes, flavonoids, polysaccharides, carotenes, and phytosterols. The strong soothing properties are attributable to the non-saponifiable component composed of flavonoids and mucilage. The immunostimulant capacity, on the other hand, is attributable to the polysaccharide component. The active ingredients contained in calendula extract, in particular flavonoids, exert an antiphlogistic effect on sensitive and inflamed skin, stimulate re-epithelialization, accelerate epidermal turnover and promote the activity of dermal fibroblasts by promoting collagen synthesis. Due to these properties, Calendula Officinalis Extract is used in different types of preparations for cosmetic use, especially those intended for sensitive or inflamed skin. ALTEA OFFICINALIS 1% The active ingredients extracted from this plant have emollient, moisturizing and anti-inflammatory properties. Thanks to the rich presence of mucilage, which tends to form a thin protective and moisturizing film-forming layer on the skin, marshmallow is useful in the presence of irritated, sensitive, dry, reddened, dehydrated, easily cracked skin. LACTIC ACID 1% It regulates keratinization by accelerating cell turnover and stimulates the synthesis of glucosaminoglycans, with the result that the skin appears brighter and more hydrated.

	PHYSIOLOGICAL PH
DIRECTIONS	Highly tolerable cleansing solution ideal for delicate and irritated skin. It cleanses without attacking the skin, promoting the restoration of the skin's pH, thanks to the use of an effective buffer system. The presence of Calendula officinalis, Marshmallow and Olive Oil soothe irritated skin and help prevent the onset of annoying redness and itching.
