

PRODUCT	KURAGE – night cream
PRIMARY PACKAGING	AIRLESS 30ml
CATEGORY	COSMETIC
INDICATIONS	Exfoliating cream based on pure retinol, retinol palmitate and mandelic acid, enriched with hyaluronic acid and vitamin E.
FEATURES	Exfoliating facial treatment, suitable for limiting the signs of skin aging by reducing imperfections and accelerating the skin renewal process.
RETINOL PALMITATE 0,5%	At the level of epithelial tissues, they play a fundamental role in keratinocyte cell differentiation processes and thanks to the induction of collagen and elastin synthesis they are effective in preventing photo-aging. The mechanism of action consists in implementing a real cellular reprogramming through actions of gene repression and derepression, which brings the skin cells back to a vital phase typical of organisms at a young age. Active ingredients with an exfoliating and regenerating effect, perform an action aimed at cell renewal with an antioxidant effect counteracting the action of free radicals.
MANDELIC ACID 1%	Natural acid with exfoliating action, given the molecular dimensions it acts on the superficial layers of the epidermis through a delicate peeling with a regenerating effect. It works in synergy with Hyaluronic Acid and Vitamin E, which enhance and enhance its smoothing and skin renewal active properties, added to a highly moisturizing effect.
LACTOBIONIC ACID 1%	Cosmetic ingredient with high skin compatibility, it guarantees an exfoliating and moisturizing effect, illuminating and smoothing the complexion.
HYALURONIC ACID 0,2%	Very effective cosmetic active even in small doses, it is known for its intense moisturizing and plumping power. It is essential in the preparation of tensor, remodeling and anti-wrinkle creams for face and décolleté. It has moisturizing, anti-dehydration and anti-aging properties.
TOCOPHERYL ACETATE 0,5%	Used in the formulation for its very powerful antioxidant activities. Counteracts the action of free radicals on the skin and slows down cellular aging. It performs an excellent moisturizing and protective activity against the epidermis.
AMAMELIS VIRGINIANA 5%	Precious natural extract with a moisturizing and soothing effect, it protects the skin by maintaining proper skin hydration.
FERULIC ACID 0,5 %	It has a high antioxidant power, thanks to its ability to fight free radicals. Helps preserve the physiological integrity of skin cells exposed to both air and UV radiation. It is used as a photoprotective agent, a retarder of skin photoaging processes and an illuminating component.
