

PRODUCT	CARBON SEB
PACKAGING	150 ml BOTTLE
CATEGORY	DERMOCOSMETIC
FUNCTIONAL INGREDIENTS	CHARCOAL POWDER 0,5% Vegetable charcoal has a detoxifying action on the skin, stimulates the elimination of toxins. It regulates the production of sebum and is very suitable for impure, oily skin and also for hair that tends to get greasy and dirty easily due to an excess of sebum in the scalp. NETTLE EXTRACT 0,5% Nettle root is an excellent scalp tonic, helps regulate sebum production, promote hair fiber growth and elasticity, and fight oily dandruff. This plant is used for its purifying, revitalizing, diuretic, soothing and astringent properties. PANTHENOL 0,5% Panthenol is a precursor of Vitamin B5, which is very important for hair health. In addition to giving intense nourishment to the hair, it is known for its emollient and soothing action on the skin, able to relieve itching and irritation and give freshness. AJUGA REPTANS EXTRACT 0,1% Ajuga Reptans, also known as Bugola or St. Lawrence's grass, is a herbaceous plant spread from Europe to Asia Minor, which hides all its beneficial properties in its leaves. The therapeutic properties of the bugle are associated with a specific active principle: the phenylpropanoid teupolioside. It is a secondary metabolite produced by Ajuga Reptans which has revealed enormous anti-inflammatory and antioxidant power. Ajuga Reptans' teupolioside has been shown to have an active role in inhibiting the 5-alpha reductase enzyme. The latter is the enzyme that transforms testosterone into DHT, which is considered one of the main causes of the onset of baldness and hair loss. The bugle therefore acts as a natural adjuvant by reducing the process of miniaturization of the hair follicle, the process that causes a shortening in the growth phase (anagen). RESVERATROL 0,1% The anti-aging properties of resveratrol manifest themselves not only internally and on the skin, but also on the physiology of the hair. This polyphenol, in fact, helps to counteract the oxidative stress caused by free radicals. Taken orally or applied directly by massaging it on the scalp, it stimulates the hair bulbs and improves collagen production. Promotes the growth of healthy hair, counteracting imperfections and the most common problems such as: dandruff, excess sebum, fragility, fall and thinning. It is useful for both women and men. Neem oil 0,25%

	Applied to the scalp, Neem oil facilitates blood circulation by improving hair growth. Thanks to its moisturizing effect, Neem helps to reinvigorate damaged hair, strengthening it from root to tip, and reduces the formation of split ends and hair loss. Lemon essential oil 0,05% Peppermint essential oil 0,1%
INDICATIONS	HYPERSEBORREA OILY SCALP GREASY DANDRUFF
