| <b>INDICATIONS</b>        | <p>Its formulation combines active ingredients, specially designed to maintain the vitality of the hair, making them more voluminous and strong and acting on the dysfunctions of the hair follicle in order to obtain the best results in a short period of time.</p> <p>Triko Forte Shampoo:</p> <ul style="list-style-type: none"> <li>• reduces hair loss</li> <li>• improves hair health</li> <li>• reactivates the hair follicles present in the scalp</li> <li>• gives volume and shine to the hair</li> <li>• restores soft and fragrant hair</li> <li>• Improves the fragility of the hair</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>ACTIVE INGREDIENTS</b> | <p><b>SILK PROTEINS 0,5%</b><br/>The quaternized silk proteins, thanks to their cationic nature, give the hair conditioning, volumizing (giving body and volume) and moisturizing properties of the stem</p> <p><b>PROCAPIL 0,1%</b><br/>Patented complex of active ingredients, consisting of:<br/>- Vitaminized Matrikina that fights follicle aging (biotinyl-GHK)<br/>- Oleanolic acid, is extracted from olive leaves, strong action on 5-<math>\alpha</math>-reductase which, by inhibiting this enzyme, reduces the transformation of testosterone into its active form, dihydrotestosterone (DHT) responsible for the duration of the hair's life. Its excess determines a premature aging of the hair, in fact in conditions of excess DHT there is an excessive number compared to the physiological conditions of hair in Catagen, therefore the percentage on the scalp between hair in Anagen and those in Catagen is strongly shifted towards this. 'last. By inhibiting 5-<math>\alpha</math>-reductase, the conditions to physiological ones.</p> <p><b>GUAR GUM 0,30%</b><br/>It determines an increase in the volume of the hair, it also has a beneficial and vitalizing action on the hair.</p> <p><b>HYDROLIZED KERATIN 0,10%</b><br/>Protein that forms the structure of the hair, acts by restructuring it, giving it a healthy and shiny appearance.</p> <p><b>PANTHENOL 0,25%</b><br/>It is a fundamental vitamin for the well-being of the hair, able to nourish it at the root, preventing dehydration and fragility. Thanks to its anti-inflammatory, anti-itch and soothing, reduces damage caused by atmospheric agents, hair dryers and plates.</p> <p><b>E.F. SERENOA REPENS 1%</b></p> |

|  |                                                                                                                                                                                                                  |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Serenoa Repens is able to block the alpha-5-reductase enzyme, whose action converts testosterone into DHT (dihydrotestosterone), responsible for hair loss and, in particular, for androgenetic alopecia.</p> |
