SIZE	<i>10 single-dose sachets of 10ml</i>
	<i>Zinc Oxide Cream – practical single-dose format</i> ➤ <i>Maximum product protection, maximum effectiveness over time</i> ➤ <i>Ease of use</i> ➤ <i>Less waste</i>
PRINCIPI ATTIVI	
ZINC OXIDE 10%	Highly eudermic inorganic compound with numerous beneficial properties for the skin: it reduces redness and soothes irritated and reactive skin, calms itching and reduces erythema from contact and sun exposure. Optimal treatment for diaper irritations.
PANTHENOL 2%	Active with a regenerating and soothing action, it acts in synergy with zinc oxide, relieving itching and giving immediate relief to irritated skin.
COPPER GLUCONATE 0.1%	Antibacterial and anti-inflammatory action. It supports collagen production, improves skin elasticity and promotes wound healing.
BISABOOL 1%	A sesquiterpene component of Chamomile, it has anti-inflammatory and skin-soothing properties ⁴ . It is often used in cosmetics intended for sensitive and delicate skin such as those of newborns, on inflamed, reddened skin, affected by atopic and seborrheic dermatitis, and for irritation in general.
VITAMIN A PALMITATE 0,05%	A highly tolerable derivative of Retinol, it helps skin regeneration as a promoter of collagen synthesis. Known for its antioxidant properties, it fights free radicals and boosts the skin's immune system.
OLIO CRUSCA DI RISO OLIO DI MANDORLA VITAMINA E ACETATO	Emollient and softening vegetable oils, they gently convey all the lipophilic substances contained in the cream, keeping the skin always soft and elastic. Vitamin E facilitates the recovery of skin elasticity.
HOW TO USE	Apply a generous amount of product to the affected area of skin previously cleansed and dry and massage gently until completely absorbed.
