

PRODUCT	AKARISCAB topical treatment
CATEGORY	COSMETIC
Directions	Adjuvant in the treatment and prevention of scabies. Prevents the proliferation of the Sarcoptes scabiei mite by creating an unfavorable environment on the skin
ACTIVE INGREDIENTS	CROTAMITON 10% Active ingredient used effectively in the treatment of itchy skin and scabies mite infestations. Its mechanism of action against the mite is not yet well understood, but it is attributed to the cooling and soothing effect on the skin subjected to irritation. Crotamiton is the only scabicide available today that shows not only antipruritic properties but also strong antibacterial properties. It is particularly indicated in the treatment of scabies in children as they are very prone to secondary bacterial infections as a result of scratching. In view of its good efficacy and excellent tolerability, the 5-application treatment scheme, with crotamiton cream applied all over the body from the chin down, can therefore be recommended as an optimal form of treatment for scabies in infants and young children. (da “Crotamiton Cream and Lotion in the Treatment of Infants and Young Children with Scabies”, D Konstantinov, MD, L Stanoeva, MD, and S J Yawalkar, MD, DVDView all authors and affiliations All Articles). PANTHENOL 0,5 % Its emollient and soothing properties are indispensable when inflamed tissues need relief. The moisturizing action of panthenol is evident when it is necessary to facilitate the process of water absorption by the skin. It also has anti-inflammatory and reparative properties of the skin. SHEA BUTTER 0,5% It is known for its countless benefits on the skin. In fact, it boasts protective, emollient, moisturizing, calming, soothing properties. Ideal for the care of irritated, chapped and dry skin. SALICYLIC ACID 1% Main exponent of <u>beta-hydroxy acids</u>, salicylic acid is a molecule with known <u>exfoliating</u> properties but also anti-inflammatory, analgesic, bacteriostatic and fungicidal. EUCALYPTUS ESSENTIAL OIL It gives the product a pleasant balsamic fragrance that helps improve patient compliance during treatment.
