

PRODUCT	BRADERM AZN SCRUB
PRIMARY PACKAGING	BOTTLE 150ML
CATEGORY	COSMETIC
ACTIVE INGREDIENTS	AZELOGLYCINE 2% It is a water-soluble derivative of Azelaic acid, therefore it is more chemically stable and more effective. Azelogylicine has antibacterial properties as it inhibits the cellular protein synthesis also has an antiseborrhoeic and sebostatic activity linked to the reduction of fatty acids, inhibiting 5-α-reductase. It also plays a anti-keratinizing action by controlling i proliferative processes of keratinocytes favoring the lysis of comedones. It has an anti-inflammatory action. It is not photosensitizing, this is a considerable advantage because it can also be used in summer, well tolerated It also has an inhibitory action against tyrosinase, a key enzyme for the synthesis of melanin, which is why it is also used in the treatment of melasma. ALLANTOIN 0,20% It is the final product of the oxidation of uric acid. It has a moisturizing and soothing action, reduces inflammation. At concentrations higher than 1% it has a mild exfoliating action. ARCTIUM LAPPA 1% It is a plant that can be found up to 1700 meters above sea level and the roots are mainly used for the therapeutic purpose. It has a antibacterial and antifungal action. Arcthiopicrin is a natural antibiotic in able to reduce the colonization of propionibacterium acne, responsible for the appearance of the papules. Arctic acid promotes healing, while inulin has antifungal power. BISABOLOL 0,05% Soothing, calming action and is able to reduce inflammation. UNDECYLENIC ACID 0,20% Antifungal and antimicrobial action.

TOCOPHERYL ACETATE 0,20%

It contributes to increase the synthesis of collagen and glycoproteins, and of Hyaluronic Acid. So it plays an important part moisturizing action, contributes to skin elasticity, also plays an action against free radicals.

CELLULOSCRUB

Exfoliant derived from biodegradable cellulose.

HOW TO USE

Apply a small amount of product on the previously wet face and massage gently with circular movements, avoiding the eye contour area. Finally rinse with warm water.
