

PRODUCT	BRADERM ELACTIVE
CATEGORY	DERMOCOSMETIC
ACTIVE INGREDIENTS	HYALURONIC ACID 0.05% It exerts an effective antioxidant action on the streaks as well as a protective and repairing function and has a high ability to bind to water. COLLAGENE MARINO 0,05% Rich in amino acids, in particular hydroxyproline, it ensures a significant increased skin hydration and elasticity. Keeps the skin toned and pleasant-looking. ELASTIN 0.5% It increases the action of marine collagen and hyaluronic acid. VIT. E acetate 0.25% It helps to increase the synthesis of collagen and glycoproteins, and hyaluronic acid. It has an important antioxidant action against free radicals and contributes to the maintenance of skin elasticity. SHEA BUTTER 3% Vegetable butter with a rich lipid composition, it has a deep emollient, re-epithelializing and moisturizing action. WHEAT PROTEIN HYDROLYSATES 0.05% Hydrolyzed wheat proteins are natural derivatives of wheat grains and constitute a unique moisturizing complex, able to penetrate deep into the skin structures, offering the right water balance to the skin and giving a silky and elastic touch. PANTENOLO 0.50% It promotes epidermal regeneration and reduces irritation thanks to its powerful soothing action. AFRICAN KIGELIA EXTRACT 2% The glycolic extract "Kigelia" is obtained from the bark of Kigellia Africana, a tree widespread in tropical Africa. It has toning, firming and elasticizing properties for the body, face, eye and lip contour and décolleté, as well as being astringent and dermopurifying. It is a plant extract rich in saponins, flavonoids and phytosterols that give it anti-radical, moisturizing, firming and microcirculation-stimulating properties. Furthermore, thanks to its particular peptide composition, it is able to make the dermis compact, forming a real invisible tensor network.
DIRECTIONS	Cream with high elasticizing, firming, and toning power, suitable for application on both the face and body, in case of loss of tone and firmness. Also useful for preventing and reducing stretch marks, even during and after pregnancy.
