

PRODUCT	BRADERM ZOYLAK MOUSSE
PRIMARY PACKAGING	FOAMER
CATEGORY	COSMETIC
	Zoylak mousse is a mousse facial cleanser that gives a light, but effective cleansing. Thanks to the presence of specific active ingredients, it promotes a soft and delicate daily cleansing of the face, also suitable for inflamed skin such as acne.
ACTIVE INGREDIENTS	ZINC SULPHATE 0,5 % Anti-seborrheic action, regulates the activity of the sebaceous gland. It has an antioxidant function to protect the skin from the action of reactive oxygen species. BURDOCK GLYCERIC EXTRACT 1 % Burdock is a plant with antibacterial and antifungal action. The arctiopicrin present in it is a natural antibiotic capable of reducing the colonization of propionibacterium acne, responsible for the appearance of papules. Arctic acid promotes healing, while inulin has an antifungal power. PANTENOL 0,5 % Its emollient and soothing properties are indispensable when inflamed tissues need relief. The moisturizing action of panthenol is evident when it is necessary to facilitate the process of water absorption by the skin. It also has anti-inflammatory and reparative properties of the skin. AZELOGLICINE 3 % It represents a water-soluble derivative of Azelaic acid, therefore it is more chemically stable and more effective. Azeloglycine has antibacterial properties as it inhibits cellular protein synthesis, it also performs a sebostatic activity linked to the reduction of fatty acids, inhibiting 5-α reductase. It also has an anti-ratifying action by controlling the proliferative processes of keratinocytes by promoting the lysis of comedones. It has anti-inflammatory action. It is not photo-sensitizing and this is a considerable advantage since you can use the product even in the summer. It exerts an inhibitory action against tyrosinase, a key enzyme for the synthesis of melanin, which is why it is also used in the treatment of melasma. VITAMIN E ACETATE 0.5 % It has a soothing and anti-inflammatory action that makes it perfect for sensitive and delicate skin. In addition, it has a protective and antioxidant action, both from atmospheric agents and oxidative stress and an elasticizing and smoothing action that makes it suitable for both the skin of the face and the body.

	BERGAMOT ESSENTIAL OIL 0,1 % Bergamot is able to disinfect the skin avoiding the proliferation of harmful bacteria. It also has an important healing function, since its essential oil allows you to rebalance the production of sebum and decrease the appearance of scars and marks, making the color and tone of the skin more uniform. RESPLANTA OLIVE (DERIVED FROM OLIVE OIL) 2 % Used for its multiple properties. Olive oil has in fact an emollient, soothing, cleansing action and is suitable for all skin types including the most delicate ones. This derivative does not grease, but gives the formulation high dermocompatibility. NICOTINAMIDE 1 % Its anti-inflammatory action is based on multifactorial mechanisms: it inhibits the release of histamine, inhibits chemotaxis of leukocytes and the synthesis of interleukins. It also has a stabilizing effect on the skin barrier, normalizing the production of epidermal sphingolipids in particular ceramides. It has a good moisturizing action, and is well tolerated by the skin. BIOLIN- P 0,5 % Innovative ingredient based on Prebiotics. Inulin and alpha-glucoligosaccharides are an important support for the development and proliferation of beneficial skin microflora. The skin microbiota is a key element in the skin protection system against aggression by pathological agents and environmental stressors. For this reason, it has been shown that the inclusion in the formulation of PREBIOTIC substances strongly helps to strengthen the skin's defense against pathogenic and opportunistic bacteria as in the case of Cutibacterium acnes (Probionibacterium acnes). These active ingredients also play a direct action on the bacterial flora that causes skin diseases by preventing their proliferation by stimulating the production of Beta-defensins, peptides with an "antibiotic" action physiologically secreted by keratinocytes.
HOW TO USE	Massage a knob of product onto the already damp face, then rinse with warm water.
